CARR'S  
TRADE  
LETTER.

As we read the signs, there is ap-  
proaching a period of increased specu-  
lation in wheat. Nothing which has  
been given to the public of late con-  
cerning wheat is so surprising as the  
details of the Northwest situation pub-  
lished for the first time to-day by a  
trade paper of high authority at Min-  
neapolis. It shows that some of the  
big mills there have been forced to shut  
down because, after having paid 35  
cents premium over December prices,  
they are unable to get enough milling  
wheat out of the daily receipts to keep  
their mills going. Very light market-  
ing of Spring wheat is not altogether  
due to the inability of railroads to  
move the grain to market, but very  
largely to short crops and a much firmer  
price on the part of wheat raisers. Wheat  
is not offered for sale in a way that per-  
mits it to move to market as in former  
years. To-day total Western receipts  
of what are 69,000 bushels short of  
the same time last year. Inter-  
esting points Northwest and all the  
milling interests in the territory tribu-  
tary to St. Louis and Kansas City are  
reporting excellent flour sales and their  
shipments limited only by scarcity of  
cars. As we noted a few days ago, for-  
eign markets are taking a much firmer  
tone. Present reports from Argentine  
count for little as it is yet two months  
to early harvest and the climatic condi-  
tions uncertain. At present there is  
only 5,000,000 bushels more wheat in  
Argentina than in November last, 1905. Low  
light than November wheat and flour  
prices have permitted both wheat and  
flour to move into consumption and  
out of the country for export freely.  
These things have laid the foundation  
for a much stronger speculative market  
in the months to come.  
Up to the time the offerings of new  
corn to the cash interests in this trade  
have not been more than one tenth  
what they were in many years previous.  
There is no such movement of old corn  
necesses to make room for the new  
crops predicted. Light export busi-  
ness from this side has created a firmer  
feeling in foreign markets. Unsettled  
weather has caused light receipts. The  
"Indian Summer" period will deter-  
mine the early movement from the new  
crop. It is not much heavier than  
normal and, unless the weather is  
favorable, it is likely to induce heavy  
trading in the months to come. We  
expect a gradual hardening  
of the market in the months to come.  
We expect a gradual hardening

**Where Cleo Took the Mud.**  
Marcus Tullius Cleo hatted in the  
mud of Lake Agass 2,000 years ago  
in order to get rid of the gout. The  
mud of the standing waters in the dis-  
trict west of Naples was famous from  
early times for the relief of arthritis.  
The famous high lines of the last  
period days knew its efficacy and no  
doubt did their "cure" there in much  
the same rough and ready fashion as  
their modern representative does now.  
It is no doubt the sulphur and  
other deposits that the mud of the lit-  
tle lakes on the promontory of Cumae  
owes its health giving properties, and  
as nature works in the same way  
now in that region as she did in the  
times of the Caesars the effect upon  
twentieth century gout is probably  
much the same as was felt by Cleo.  
I soaked his infirmed joints in the  
ozone of the Phlegrean fields.

**Making Paint With Skin Milk.**  
Skin milk is a golden oil with three  
pounds of Portland cement and add  
sufficient Venetian red paint powder to  
impart a good color. Any other color  
may be used by using the same oil.  
The skin milk will hold the paint in sus-  
pension, but the cement, being heavy,  
will sink to the bottom, so that it becomes  
necessary to keep the mixture well  
stirred with a paddle. Mix only enough  
at a time for one day's use. Six hours  
after painting this paint will be as in-  
vincible and unaffected by water as a  
month old paint. Cases are on record  
of this sort of paint being in good con-  
dition after twenty years, and it has  
preserved the wood admirably. The  
addition of carbolic acid or some other  
disinfectant makes it very suitable for  
dry work, as it then has a cleansing  
effect.—St. Louis Republic.

**Scared Both of Them.**  
When Mr. Justice Maule was in the  
bench a bullying counsel was one day  
presenting an elderly female wit-  
ness in a case before him. Having  
battered her into a state of utter  
speechlessness, the lawyer appealed to  
the judge to make her answer his ques-  
tions. "Why do you not answer, mad-  
am?" asked the judge. "Because, my  
lord, he scares me so," replied the  
trembling woman. "So does he me,  
ma'am," said the judge.—Law Notes.

**Kissing the Hand.**  
The danger of infection which lies in  
the custom of "kissing the hand" is  
once more being discussed in Ger-  
many. One writer notes that this dan-  
ger was already known to the Roman  
emperor, Tiberius, who, as Suetonius  
notes, issued an edict against this  
practice, at that time in general vogue,  
on hygienic grounds.

**Comforting.**  
Old Crockybo—I think we'd better  
have the passage and staircase re-  
paired while I'm laid up. Mrs. Grimage.  
Mrs. G. (his housekeeper)—"Lor, sir;  
'adn't yer better wait and see 'ow ye  
goes on first? Them coffins do make  
such work with staircase wallpapers."—  
Smiles.

**Waking Progress.**  
"Have the detectives got any clew  
yet?" Inquired the reporter.  
"I don't know," said the woman  
whose house had been robbed. "My  
husband says they have got a hypothe-  
sis. That's about the same thing, isn't  
it?"—Indianapolis News.

**Pleasant Punishment.**  
Pastor—I hear that the lightning  
struck your house, Hohenbauer. That  
is a punishment for your wickedness.  
Penant—Well, sir, it's a punishment I  
wouldn't mind having again, for I got  
4,000 marks transference from it.—Lustige  
Blatter.

**The City of Munich.**  
Munich is one of the most beautiful  
cities in Europe, with broad streets,  
frequent fountains, many stately stat-  
ues, numerous open squares, large  
wooded parks, a swift river flowing  
directly through the center of the  
residence section, galleries that contain  
several of the finest recollections of  
pictures and sculpture in the world, li-  
braries, academies of design, schools  
of science, a magnificent opera house,  
a theater that was erected exclusively  
for the production of Wagner's opera,  
and various other attractions which do  
not disturb the classic atmosphere,  
but appeal to the artist, the student  
and whoever seeks for beauty and for  
rest. No city of equal size has so many  
noble monuments and public build-  
ings. Probably a larger number of the  
population of Munich is engaged in  
study and artistic and scientific pur-  
suits than in any city in the world.  
The Royal library is one of the  
greatest in existence, probably second  
only to the British museum.—William  
E. Curtis in Chicago Record-Herald.

**Moving on the Installation Plan.**  
An expressman who called at a  
Ninety-second street boarding house  
for two trunks was asked by the land-  
lady where they were going.  
"I don't know," he said. "You see, I  
do only half the hauling. I will take  
the things to the office and somebody  
else will take them the rest of the way.  
The boss at the desk will know the ad-  
dress. The moving is done on the in-  
stallation plan to keep you in this here  
from finding out where the other peo-  
ple went. They were afraid to trust  
with the number for fear you might  
warn them out of me, so they told it to  
nobody but the manager. Lots of peo-  
ple who move often make the trip in  
sections like that. Half the time when  
I take a trunk away from you folks here  
I don't know where it will wind up.  
That is generally done when there  
has been a row and the folks who leave  
don't want to get rid of the trunk. It's  
a little trouble here, I imagine," he added  
tentatively.  
"Yes," sighed the landlady, "a little."  
—New York Sun.

**Simultaneous Revival.**  
Wheeling, W. Va., Oct. 28.—A simul-  
taneous revival is in progress in all  
the West Virginia churches of the  
Christian denomination, and a very  
unusual interest in attendance to the  
church members is being secured. In  
Wheeling the results are not up to  
the expectations, but in most of the  
towns accessions are more numerous,  
reaching already more than 2,000.  
The revival reached its climax in  
Wheeling Sunday with a great mass  
meeting which 2,000 people attended.  
More than 40 churches located in  
Parkersburg, Wheeling, Huntington,  
Sistersville and Clarkburg held re-  
vivals. This is a new move in relig-  
ious circles, and it is attracting much  
attention.

**Denatured Alcohol.**  
Washington, Nov. 2.—The depart-  
ment of agriculture, through Dr. H. W.  
Wiley, chief of the bureau of chemis-  
try, has undertaken to educate the  
farmers regarding the manufacture of  
denatured alcohol. Two bulletins were  
issued devoted to the description of  
the various methods of denaturing al-  
cohol. The first bulletin describes the  
method of manufacture and to some  
extent to which it may be put.  
Because of the government regula-  
tions under which the farmer would  
be required to conduct his still, if he  
engaged in the manufacture, it is  
evident that he must be content with  
producing the raw material, and that  
he cannot look forward to becoming a  
practical distiller.

**Found in Dead Letter Office.**  
Washington, Nov. 2.—Carelessness  
in sending money through the mails is  
commented on in a bulletin issued by  
the postoffice department. One case  
is given where the dead letter office  
received a letter from a postmaster ad-  
dressed to a missionary in Africa. His  
name was given but no postoffice ad-  
dress. The letter was handed in  
various postoffices there as well as in  
Europe and returned to the  
United States. It was opened at the  
dead letter office and found to contain  
\$400 in gold certificates. The letter  
was signed by the postmaster, but his  
name and address will not be made public.

**Slept Twelve Years.**  
Columbia, Ky., Nov. 2.—One of the  
most remarkable cases in the annals  
of medical science has just come to  
light in Russell county, the truth of  
which is vouched for by prominent  
citizens of that community. Herschel  
Grider, 63, of near Rowena, fell asleep  
12 years ago, and all efforts to awaken  
him proved unavailing till Thursday.  
During that time he was given liquid  
nourishment twice a day. "The man's  
pulse and physical condition are said  
to be normal, and his muscles are  
more supple than a man who has had  
exercise. Physicians are puzzled over  
the strange malady.

**Officers Shot By Negro.**  
Ripley, Tenn., Oct. 30.—Four off-  
icers raised a crap game near Holl's  
Point. When the officers entered the  
building where the game was going  
on, George Bates, a negro, drew a  
revolver and shot and killed Officer  
Saeely and probably fatally wounded  
Officer John Bowers. The negro was  
killed by the other officers. The other  
officers while they were bringing him  
to Ripley and hanged by a mob.

**Cure For Sleeping Sickness.**  
Marseilles, Oct. 30.—Letters have  
been received here from Saigon,  
French Cochinchina, saying that two  
French doctors have discovered that  
the hitherto fatal sleeping sickness  
can be cured by means of thymol. One  
hundred and fifty patients have been  
treated with this remedy and a large  
majority have recovered.

**Got Away With \$1,500,000.**  
Toronto, Ont., Nov. 2.—The loss to  
the Ontario bank through the pecu-  
liations of Charles McNeil, the ex-  
cise agent, is officially stated as being  
\$1,500,000.

his parents on Friday afternoon, of  
diphtheria, at the age of one year. The  
body was buried in the Taul grave  
yard on the following day. The little

When Lord Rayleigh, the British  
scientist, was a student at Cambridge  
the examiners set among other prob-  
lems one which they based on an  
article in a German mathematical peri-  
odical supposed unlikely to have pen-  
etrated to Cambridge. Only two men  
solved it, Mr. Sturt (Lord Rayleigh)  
and another. The examiners asked the  
other man about this problem. "Oh,"  
he said, "I take the question (men-  
tioning the name of the periodical), and I was  
very glad to find that, thanks to a  
man in the last number, that prob-  
lem came out quite easily." When Mr.  
Sturt's turn came they expected a  
similar answer, but he astonished them  
by replying: "The fact is, gentle-  
men, that I sometimes contribute to  
—, and I could not help feeling great-  
ly flattered that you should have  
thought my little problem worthy of a  
place in this examination." He was

To its coal supply, more than twice as  
great as the combined coal area of Great  
Britain, Germany and Pennsylvania, is  
its vast store of natural gas as sup-  
plementary sources of power and heat  
and light, the South adds at least 3,000,  
000 available horse-power of water-  
powers for utilization for electrical trans-  
mission, also for power, heat and light.The development of this vast water-  
power potentiality will eventually  
employ \$250,000,000 to \$300,000,000 and  
be equal in working capacity to 6,000,000  
men. It will make possible construction  
of thousands of miles of interurban elec-  
tric roads, it will furnish cheap power  
and light for mines and factories, and  
create, as in Switzerland, the highest  
form of skilled mechanical work in the  
mountains of the South, where climatic  
conditions are unsurpassed by any other  
section of the world. In counting up the  
riches of the South always bear in mind  
its wealth of ever-running streams,  
where nature furnishes the power with-  
out cost except for the cost of develop-  
ment. [Manufacturers' Record, Balti-

The Public in Speculation.

The public is a body never buys anything when it is cheap. There are numerous reasons for this. To begin with, the point of view of the successful speculator and that of the public trader are entirely different. The first named operates on deductions, on carefully created theories of what conditions will be a year or two years hence. The unsophisticated trader acts upon whatever of the future is already apparent. It is again a platitude to say that Wall street discounts everything good or bad, but how many people who mull this axiom extract its full meaning? They do not realize that this discounting means, not the gauging of the known, but of the wholly unknown. The man who acts today on the probable conditions of the long, unseen future is the man who makes money, in Wall street or in any other enterprises for that matter, and the man whose mind goes farthest ahead makes the most money. "If I could only see the tape a month ahead!" cries the tyro. There are many men who see it a year ahead, not in its surges and fractions, but in its great and important entirety. —Thomas Gilson in Moody's Magazine.

Far Not Always What They Seem.

Does the average boy buyer know that the far eastern link is simply a devil's warrant with the black stripes painted in with a toothbrush? Does the buyer know that the low priced black link sets are nothing but common widows or Hounamunary sets or in some cases soft Chinese wolf skin? Does he know that the white enamel pillow scarf selling for a song are really sweats and yellow woolsens that, since a white weasel commands almost as high a price as its dear relative, the squirrel? Then the subtle heat scarfs and snuffs that sell for a few dollars are of course nothing but cone or hare, while the cheaper carafel sets are simply kid or walrus skin in something entirely different from carafel as different indeed as ordinary Persian is from broadcloth. The beautiful imitation fox sets that appear also are generally mutton, or in some cases combed white rabbit. —Nugent's Bulletin.

A Darling Dishop.

A story of the great Bishop Selwyn of New Zealand is told by Commander Gumbler of the British navy in his book. The bishop's missionary yacht, the Southern Cross, touched a coral reef when entering the harbor Port of France, New Caledonia. It became necessary to examine her bottom, but the sharks were so numerous and so daring that nobody would venture into the water. "So the bishop, who held that if a man showed a bold front to a shark he would shoo off, went overboard himself with a long sharp knife in his mouth for defense, and diving under his vessel, examined the damage. He then came on board our ship, and we arranged to caress the yacht sufficiently to enable him to sail on some copper shaves, which he did himself, again spending a long time in the water. For some curious reason not a single shark howl in sight all the time?"

Many a Slip For the Farmer.

"Holding wheat is no easy task," remarked a farmer. "One year I had 500 acres of wheat and wheat was laid out of doors. It stood breast high, and it seemed good for forty bushels to the acre. That meant to me a profit of \$7500. I had the team and harrowed lands engaged and expected to begin cutting on Monday. On Friday afternoon there came out of the northwest a howling gale. Following a heavy rain, the hail fell. It then alighted the wheat was flattened to six inches from the ground. We cut a little of it for hay. The remainder rotted on the ground. The mortgage on the farm was foreclosed, and I hired out by the day to support my family. Do you wonder that the wheat farmer is not hawthorn of his crop until he has it in the granary?" —Outlook.

The Oldest Tunnel.

The oldest known tunnel in the world is that of Sileah, near Jerusalem. It was used as an aqueduct. The famous inscription, discovered some years ago, celebrates the first meeting of the diggers from both sides. Newspapers did not appear in those days, and so the event cannot be exactly dated, but it most probably took place under King Hereshiah, about 700 B. C., and is an interesting testimony to the high state of civilization among the Jews at a time when Europe was inhabited by savages. —American Israelite.

Shocking Mortality.

The crowded ship gate a sudden lurch.

There was a splash.

"Oh," wailed the young woman who had been sitting near the rail reading a book, "think of all those lives being lost!"

But nothing could be done, and she gazed sadly at her copy of "Plutarch" dancing merrily on the waves far astern. —Chicago Tribune.

A Kaffir Story.

This Kaffir story is true: A Christian abolitionist was once recounting to another Kaffir a vision of heaven of which he had had a dream. "And saw you any Kaffirs there?" inquired his listener.

"The folks of the story seemed evil, and then," "No," said he, "for I did not look into the kitchen."

The Silver Liner.

Mrs. Suburban after the crash—There is another of my china dishes gone!

Suburban—Never mind, dear; it has stopped the cook's stinging.

At one time during the life of John Bright there were no fewer than seven members of his family with seats in the house of commons.

## Many Persons Have Catarrh of Kidneys But Do Not Recognize It.

DAVID L. JAYCOX.

Mr. David L. Jaycox, Chaplain Clarence L. O. G. T. and Chaplain G. A. H., 80 Broadway, Oakland, Cal., writes:

"I am an old war veteran. I contracted severe bladder and kidney trouble. I spent hundreds of dollars and consulted a host of doctors, but neither did me any good. Finally some of my comrades who had been cured by Peruna advised me to try it. At once I bought a bottle and it helped me so much that I kept using it for nearly four months. Peruna has proven the best medicine I ever used. My pains are gone and I believe myself to be cured. I feel well and would not be without a bottle in time of need for ten times its cost."

### THE LOCAL NEWSPAPER

Its Importance Not Appreciated by Some Persons.

It is the local press which serves you in every emergency. There you go to trouble. It is there you go to prosperity. If you want to boom any manufacturing enterprise, any railroad project, for the development of your town, for a village to increase your influence, or if your lodge desires to add to its membership or to erect a new hall or in any way advance its interests, the local press is immediately appealed to for help. So it is with non-profits. It is a place for a festival or even a carpet race or a regatta. The local press is found to be useful in numerous every-day affairs. It is the local press which is the ambassador of Christ, the columns of the local paper are filled with religious articles, in advertising the various religious meetings. The church leaders and preachers find also the importance of the local press.

Clearly there are many reasons why

## A War Veteran Spends Hundreds of Dollars in His Quest to Cure Kidney Trouble. He Took Peruna Upon a Friend's Advice and It Proved the Best Medicine He Ever Used.

CATARRH of the kidneys is a very much neglected disease. It is not until the disease has a firm hold on the kidneys that the patient begins to realize that there is some danger of these organs.

The slight backaches, the feelings of lassitude, and other warning symptoms of kidney disease are overlooked. They are not serious enough to detain the patient from his regular work. Even when he discovers that the kidneys are affected, he does not recognize the difficulty as being caused by catarrh.

Catarrh is sometimes so very gradual in its approach and its earlier symptoms cause such slight discomfort that it is not noticed.

However, when it once firmly seizes the kidneys, it becomes a difficult disease to exterminate.

Indeed, catarrh of the kidneys is more serious than catarrh affecting some of the other organs of the body. In the kidneys, it is liable to terminate in Bright's Disease or diabetes, both of which are recognized as very serious ailments, if not fatal.

The thing to be done, when catarrh of the kidneys is discovered, is to take some internal, systematic remedy, one that reaches the very source of the catarrh and removes the cause of the difficulty.

Such a remedy has been found in Peruna. It reaches catarrh, no matter where it may be located in the body—whether in the more exposed membrane of the nose and throat, or whether in the remotest part of the kidneys.

That Peruna is a sure and safe and most reliable remedy for catarrh of the kidneys is proven by the many testimonials written by those who have experienced its benefits. The testimonials given here are only a specimen of the many testimonials on our records, pertaining to the relief afforded by Peruna in various cases of kidney trouble.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys every three minutes.

The kidneys are your blood purifiers. They filter out the waste or impurities in the blood.

If they are sick or fail to do their duty, the blood is impure.

Pains, aches and rheumatism come from impure blood.

Impure blood causes quick and untidy heart beats, and makes one feel as though they had heart trouble.

Over-working, pushing, thick, kidney-poisoned blood through veins and arteries.

It is to be considered that only urinary troubles were to be traced to the kidneys.

But now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits by all druggists in fifty-cent and one-dollar sizes.

You may have a sample bottle by mail. Send 3c. to Dr. Kilmer's Swamp-Root, and the address, Poughkeepsie, N. Y.

## Drinking Among Women.

The frequency with which even respectable women drink cocktails, whisky straight and wines of all kinds in public places, especially in large cities, is a matter of common observation, and scenes that shocked us 20 years ago are now passed by without comment. Indeed as common is the drinking among women in our large cities that the situation is often a source of embarrassment to the woman who does not drink.

The disastrous results of dipping among women are already too well known to the physicians, and experience shows that while men who drink often reform women who become victims to drink, are more intractable to reformation.

The medical director of one of New York's leading institutions for nervous and mental diseases recently wrote to me as follows: "The medical profession knows only too well the increasing tendency to tipping among society women and its disastrous results. Fully 70 per cent. of the drug case among women come of first using alcoholic stimulants, overindulgence of fashionable dinners, or other social functions, creates the necessity for the quick recovery from the induced debauch; morphine or something of a like nature is taken, the inevitable consequence are an increased necessity for stimulants, and a repetition of the drug, increased nervousness and mental degradation follow. Once a woman acquires a taste for stimulants she is in a large degree a hopeless wreck. Especially is this true in the higher circles, where the sentiment lead and society sanctions."

"Man's idea of what woman ought to be is based upon this conception of what she normally is—higher and better than himself. His own sinful and selfish desires are the main factors in dragging woman down from the pedestal upon which he himself has placed her, and yet with his strange inconsistency he will idolize her if she resists. If by common consent sin seems blacker in woman than in man, it is because she is by nature purer and has farther to fall. If I seem to condemn sin the woman more than in man, I am for that reason pining to woman the highest and best compulsion. Intoxicants are dangerous enough to men, to women they are much more so. Romulus sentenced women to death for intoxication as the beginning of unfaithfulness to the marriage vow. The virtue of the woman with the drink habit is always in danger."

The effect of alcohol upon women's will power and sense of moral responsibility are even more marked than in the man, woman's emotional organization being so much more susceptible than that of man.

Any ordinary observer must have noticed in the brilliant cafes of our cities that most women drink as freely and frequently as their male companions.

Twenty years ago if you took a woman to a place of amusement, you might ask her afterward if she would have an ice cream, but now take her to a restaurant and before you ask her if she wants anything to eat, you say to the waiter: "Two Manhattans, please."

But what may be seen in festive assemblies in public places is nothing in comparison with what may be seen in private parlors by those who mingle freely in society. I have seen at such times woman's eyes sparkle with an unwonted fire and the gleam of her merriment was something more than the natural glow of her own spirits.

Since fashion is only another term for public sentiment, I contend that were the higher classes of society to discontinue the moderate use of drink, the effect would be to render drinking unfashionable.

I know how tyrannical fashion is, and that there are many persons who would rather be out of the world than out of fashion, but improbable may be the success in changing the custom of society by your emphatic protest, the improbability of your success is no reason for being silent. If you attempt nothing you will accomplish nothing.

Social usages can be more easily changed than at first supposed. If only a small number of women in every community of those who are raised by their wealth and social standing above the accusation of meanness, and by courageously standing above the suspicion so dreadful to endure, of being fashionable—if only one or two families in each community were to take such a stand, there would be many to follow and a year would show great improvement.

It is woman's influence to which we must look for the change required. If woman really wishes to change the custom, it will be accomplished.—Ex.

## Underground Waters of Western Kentucky.

A valuable and interesting discussion of the underground water resources of Kentucky west of Tennessee River is contained in Water-Supply and Irrigation Paper No. 164, just issued by the United States Geological Survey. The investigations made by the Hydrographic Branch of the Geological Survey show that in western Kentucky the underground water resources are largely dependent on the local rainfall. The springs and shallow wells derive their supplies exclusively from the rain falling in their immediate vicinity, while the rocks from which the deep wells obtain waters are supplied by the rain that falls within the state or in the area just west of Mississippi River. In only a few cases do deep wells pierce the hard rocks that lay beneath the soft sands and clays. In Water-Supply Paper No. 164, which may be obtained on application to the Director of the United States Geological Survey at Washington, D. C., are discussed the general conditions that govern the occurrence of water in wells and the relation of the geology of the region to the supply of underground water. These general discussions are followed by detailed descriptions that show the water conditions in each county, the depth at which water may be obtained, and the height to which it rises without pumping.

The best treatment for indigestion and troubles of the stomach is to rest the stomach. It can be rested by starvation or by the use of a good digestant which will digest the food eaten, thus taking the work off the stomach. At the proper temperature single teaspoonful of Kodol will wholly digest 3,000 grains of food. It relieves the present annoyance, puts the stomach in shape to satisfactorily perform its functions. Good for indigestion, sour stomach, flatulence, palpitation of the heart and dyspepsia. Kodol is made in strict conformity with the National Pure Food and Drug Law. Sold by All Druggists.

## A WEEK'S HAPPENINGS

RELATING TO AFFAIRS IN THIS AND ADJOINING STATES.

**Pitched Battle Between Railway Employees—Attendees of Asylum Convicted of Maltreating Insane Inmate—Convicts' Clever Dodge.**

**Louisville, Ky., Oct. 29.**—A pitched battle with picks and shovels and gas as weapons, in which 400 men participated, was fought by rival track-laying gangs of the Louisville & Nashville railroad and the Louisville & Eastern electric railways. About two scores of the combatants were badly battered up, but none was seriously wounded. The fight took place just east of Beards, 20 miles east of Louisville, where a gang of 100 Louisville & Eastern men attempted to lay their track across the Louisville & Nashville line. They had only partially finished their work when 300 L. & N. men appeared and started tearing up the rails. A general battle followed immediately, during which the Louisville & Eastern men reacted by a novel expedient of changing the rails they had laid with electricity from a trolley wire. When the L. & N. men applied their crowbars to the charged rails a score of them were knocked stiff. All, however, soon recovered. County officials of Oldham county put an end to the fight and arrested two dozen of the leaders on each side.

**Asylum Attendant Convicted.**  
**Lexington, Ky., Oct. 29.**—After 12½ hours' deliberation the jury which tried Daniel M. Adams, a former attendant at the Eastern Kentucky asylum, charged with the murder of Fred Ketterer, a patient there, returned a verdict finding Adams guilty of assault and battery and fixing the punishment at one year's imprisonment in the county jail. The verdict is criticized adversely by many people. Fred Pharis, charged with the same murder, was sentenced to five years in the penitentiary last week. M. W. Laiggett, charged with the same crime, will be tried this week.

**Located in a Cave.**  
**Mayking, Ky., Nov. 2.**—The alleged despoiler of criminal, maverack outlaw, Joe Davidson, who is charged with slaying to death John Trivitt, on Live Fork creek, two months ago, was located, heavily armed, in a cave in the Cumberland mountains at the head of Live Fork. A posse went to the scene, but an attempt to arrest Davidson in his stronghold means loss of life. He fought through such celebrated wars as the French-Boisde and the Hatfield-McCoy feuds. There is a reward of \$300 offered for him.

**Students and Police Fight.**  
**Lexington, Ky., Nov. 1.**—In a fight between 600 Kentucky State college students and policemen here four policemen were struck on the head with rocks and severely injured. The college students were playing ball on a park and attempted to pry a street car from the track, when the patrolmen arrived on the scene. The students immediately seized rocks and began pelting the policemen. Reserves were called and five of the students were arrested.

**Carvers Incarcerated.**  
**Richmond, Ky., Oct. 29.**—John Park, James White and Thomas Graves of Clay's Ferry, farmers, were found guilty of having maliciously cut James Townsend, a Whitehall farmer, James and John White were fined \$250 each and given six months in jail. The other two, Park White and Graves, were fined \$120 each and given six months in jail. Townsend was returning from a church entertainment when attacked by the four men.

**Death of J. P. Amaden.**  
**Lexington, Ky., Oct. 20.**—After lingering two weeks with pneumonia, J. P. Amaden, of Versailles, Ky., president of the Louisville and Atlantic railroad, and president of the J. P. Amaden Banking company of Versailles, died here. He was stepfather to J. B. Haggle, one of the most widely known turfmen and copper mine owners in America.

**Students Before Grand Jury.**  
**Lexington, Ky., Nov. 2.**—Practically every one of the 300 students boarding at the two dormitories at Kentucky State college in this city will be summoned to appear before the grand jury on account of the affray with the police. President J. K. Patterson of the college was before the grand jury of the members of the faculty will appear. Seven students are under arrest.

**Will Move Railroad Shops.**  
**Blue Ridge, Ga., Nov. 2.**—The railroad shops of the Atlanta division of the Louisville & Nashville railroad, which have been here 10 years, will be removed at once to Etowah, Tenn. The removal affects a number of employees. No reason is assigned.

**Wanted by a Mob.**  
**Mayking, Ky., Oct. 29.**—Charged with attacking Miss Mary Qualls of Norton, John Depsey, 35, of Appaloosa, was arrested, thereby escaping an infuriated mob organized at Blackwood to lynch him. Depsey was taken to the Wise county prison.

**Tobacco Man Falls.**  
**Louisville, Ky., Nov. 2.**—Edgar D. Martin of the tobacco firm of H. M. Martin & Co., filed a petition in bankruptcy listing liabilities of \$161,761 and assets of \$80, on which exemption is claimed.

**Saved Out of Jail.**  
**Lancaster, Ky., Oct. 29.**—Ollie Ball, charged with horse stealing, broke jail here by sawing the bars of his cell. He took table knives from the jail kitchen and converted them into saws.
